

Tinnitus Relief App

When it comes to managing individual tinnitus needs, there's no such thing as too much personalisation. As well as the Sound Generator option built into our Danalogic hearing aids, GN Hearing has developed a Tinnitus Relief app to further personalise management plans.

The Tinnitus Relief app offers information on tinnitus, layered sound landscapes, guided relaxation exercises, and additional activities that create a completely personalised tinnitus solution.

The GN Hearing Tinnitus Relief app is available for download from the App Store for iOS devices and Google Play™ for select Android devices.

Search for ReSound Tinnitus Relief on Google Play and the App Store.
