

Remote hearing aid adjustments from your phone or tablet

It is now possible to have your hearing aid settings adjusted without the need to attend the audiology department.

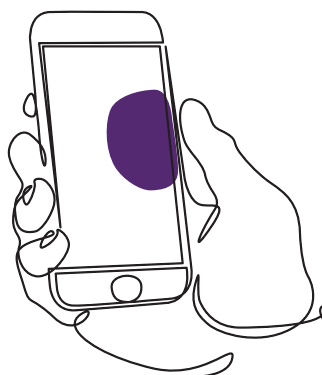

This can be done using the BeMore app

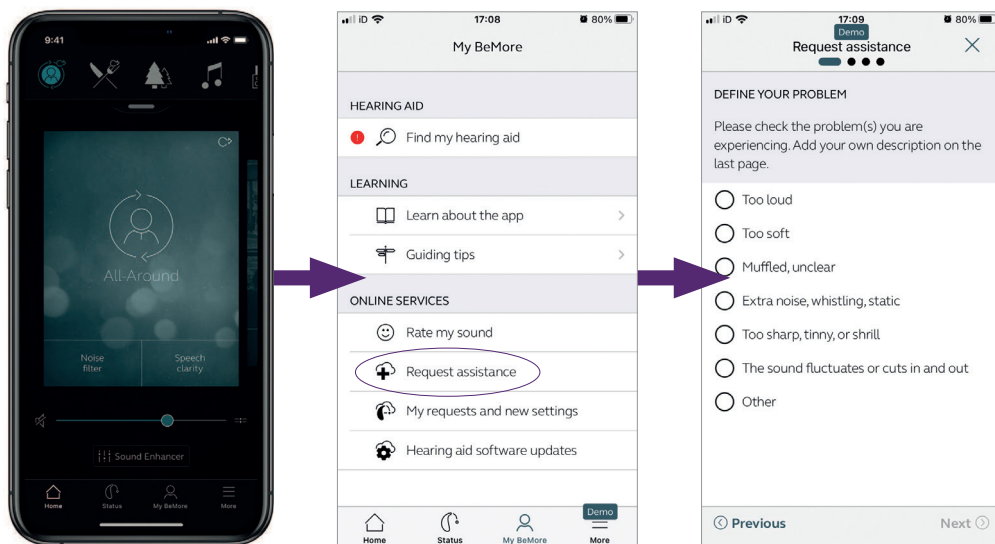

Benefits of using remote care

- No appointment necessary (live assistance may require a scheduled call)
- Faster access to hearing aid adjustments
- No need to travel to the clinic
- Try your new settings immediately in your own environment
- Provide the Audiologist with feedback or undo adjustments if required

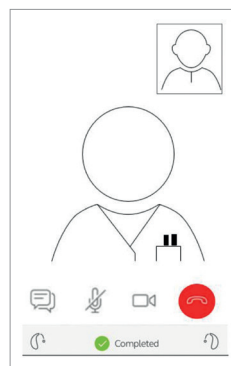

**Remote Care will need to be activated by your Audiologist.
Your consent is required for data protection purposes.**

Request remote hearing aid adjustments in the My BeMore section of your BeMore app

The hearing aid department may offer remote real-time adjustments during a pre-arranged video call. Please confirm with your local department if this service is available.
