

Tinnitus Relief app

When it comes to managing your individual tinnitus needs, there's no such thing as too much personalisation.

As well as a Sound Generator option built into our Danalogic hearing aids, GN Hearing has developed a Tinnitus Relief app to further personalise management plans.

The Tinnitus Relief app offers information on tinnitus, layered sound landscapes, guided relaxation exercises, and additional activities that create a completely personalised tinnitus solution.

The GN Hearing Tinnitus Relief app is available for download from the App Store for iOS devices and Google Play™ for select Android™ devices.

Search for **ReSound Tinnitus Relief** on Google Play and the App Store.
